

Call for Applications that focus on Quality Improvement (QI)

CPA Grant Competition

One to two grants up to \$10,000 each will be available for Quality Improvement (QI) scholarly activities for members of the Department of Paediatrics. The mandate of this fund aligns with the Department's and Hospital strategic priorities: *to ensure quality and accountability in everything we do including partnering with patients and families, exemplifying compassionate communication and care, eliminating preventable harm, and optimizing efficiency and resource use.*

Final adjudication of grant will include a score derived from the following recommended requirements that should be included in the submitted proposal:

- The relevance of the project to your career development
- Advancement of one or more domains of quality: safety, timeliness, effectiveness, efficiency, equity, and patient-centeredness. Alignment with strategic priorities is encouraged.
- Identification of key stakeholders and collaborators (projects involving an interprofessional and multi-disciplinary team-based approach are encouraged)
- A family of measures (outcome and balancing measures are required at a minimum) along with the data measurement plan
- A systems-based and/or multipronged intervention strategy planned
- An implementation plan that involves iterative tests of change using PDSA (Plan, Do, Study, Act) Cycles (not a pre/post analysis)

Application for this grant will be through the usual CPA grant competition process.
